PROFESSIONAL SUMMARY

Senior Software Engineer and Marketing Technology Leader with 11+ years of progressive experience leading large-scale enterprise martech and SaaS implementations, email development, and technical program management. Expert in architecting and delivering sophisticated email marketing solutions across multiple Enterprise Service Provider platforms including Salesforce Marketing Cloud, Oracle Responsys, Marketo, Klaviyo, Acoustic, and Sailthru. Designs and ships internal tools and automations that materially accelerate onboarding and migration workflows for Professional Services. Proven track record leading cross-functional international teams, managing complex technical integrations, and driving measurable business outcomes through data-driven optimization. Deep technical expertise in HTML/CSS email development, JavaScript, AmpScript, SSJS, SQL, and API integrations combined with strong leadership in stakeholder management, program governance, and team building. Disciplined user of project management tools (Asana, Jira, Smartsheet) to manage roadmaps, RAID logs, and cross-team dependencies. Delivered consistent $\geq 98\%$ on-time SLA achievement while serving enterprise clients across retail, travel, hospitality, and financial sectors.

PROFESSIONAL EXPERIENCE

Lead Engineer, Professional Services

March 2025 – Present

Wunderkind | United States

- **Lead large-scale enterprise martech implementations end-to-end for SaaS customers** — including ESP integrations, sender builds, auth flows, template validation, and deliverability guardrails — ensuring on-time, in-scope delivery.
- Led a team of [#] to implement a large-scale email marketing solution for an enterprise client, ensuring seamless data integration and platform configuration, resulting in a [##]% increase in campaign efficiency.
- **Manage cross-functional programs using Asana, Jira, and Smartsheet** to plan multi-workstream migrations, maintain RAID logs, track dependencies, and own critical paths across enterprise rollouts.
- Direct cross-functional teams to deliver data-driven lifecycle and integration programs on time and within scope.
- Align executives, partners, and vendors while translating technical constraints into business tradeoffs and go/no-go criteria.
- Establish governance frameworks, escalation paths, and decision logs to reduce MTTR and increase predictability.
- Design event schemas, author JavaScript mappings and JSON payload tests, and enforce schema compatibility across integrations.
- Diagnose rate limiting and payload issues; implement safe validation workflows and production test harnesses.
- Guide identity/ID mapping strategies; stabilize feeds/OMS and clarify SFTP retention to maintain data continuity.
- Drive triage for segmentation zeros, platform errors, and tagging mismatches; verify fixes and prevent regressions.
- Execute audience deprovisioning and sender changes with rollback plans, cutover playbooks, and QA checkpoints.
- Author onboarding guides and reusable playbooks that accelerate ramp and standardize best practices across teams.
- Define success measures, reporting guardrails, and post-launch verification to protect revenue and customer experience.
- Produce concise status updates and risk narratives; influence decisions across Product, Engineering, and GTM stakeholders.

Software Engineering Manager

April 2022 – March 2025 (3 Years)

Wunderkind | Indianapolis, IN

- **Managed 5 direct reports across DevOps and Integrations teams**, plus coordinated distributed offshore engineering squads across India, Brazil, and Canada — aligning work across time zones to maintain delivery cadence and consistent quality standards.
- **Owned the SmarterHQ-to-Wunderkind platform migration and deprovisioning end-to-end**, sequencing client cutovers to preserve campaign performance and data continuity with zero degradation in delivery or quality during transition.
- Managed large-scale enterprise implementations and complex martech integrations for SaaS customers, leading multi-disciplinary international squads to ship lifecycle marketing and data-integration programs on time and within scope — balancing risk, quality, and speed.
- Ran weekly 1:1s, quarterly check-ins, and annual performance reviews; set individual development goals and tracked growth against them. Authored performance improvement plans where needed and led role transitions and team restructuring with clear documentation, fair process, and minimal disruption to delivery.
- Drove program execution in Asana and Jira, instituting roadmaps, RAID logs, and decision frameworks to improve predictability, accelerate triage, and shorten the path from discovery to verified resolution.
- Mentored engineers across Integrations and DevOps, building bench strength in event schema design, API integration, and identity resolution to reduce single points of knowledge.
- Defined standards for event schemas, JSON contracts, and JavaScript implementations across the marketing technology stack.
- Guided identity resolution strategies and stabilized data feeds and order management systems, ensuring data continuity across enterprise clients.
- Partnered with Product, Engineering, and Go-To-Market teams to align technical solutions with business objectives.
- Implemented validation workflows and production test harnesses to diagnose and resolve platform issues, reducing mean time to resolution.
- Drove continuous campaign optimization through A/B testing, audience segmentation, and performance analysis.

Manager of Campaign Services

July 2021 – April 2022 (10 Months)

Wunderkind | Indianapolis, IN

- **Managed 2 teams totaling 5 direct reports** spanning integrations and email delivery — owning client setup, campaign build, and execution against a 30-day onboarding-to-launch timeframe.
- Held weekly 1:1s, quarterly check-ins, and annual reviews; coached team members on technical skills and career progression while managing performance issues through structured improvement plans and transitions.
- Built a high-performing campaign operations team achieving ≥98% on-time SLA for launches while increasing throughput without additional headcount.
- Orchestrated end-to-end workflows: intake → build → QA → launch → reporting, eliminating handoff bottlenecks and shortening cycle time.
- Built repeatable onboarding and execution playbooks that let new and offshore team members ramp quickly and deliver to standard.
- Drove A/B testing, creative iteration, and send-time/pacing optimization to increase revenue per send.
- Implemented IP warming plans, list hygiene protocols, and authentication standards (SPF/DKIM/DMARC).
- Developed standardized operating procedures, quality checklists, and training materials.
- Built KPI dashboards and reporting frameworks to track campaign performance and demonstrate business impact.

Campaign Services Team Lead

2014 – April 2022 (8 Years)

Wunderkind | Indianapolis, IN

- Led high-performing team delivering ≥98% on-time launches; standardized intake → build → QA → launch → retro processes.

- Designed, coded, and shipped responsive, accessible emails and modular templates (HTML/CSS, MJML, dynamic content).
- Executed cross-client/device QA ensuring deliverability and performance for enterprise retail, travel, and hospitality clients.
- Launched welcome series, browse/cart abandonment, post-purchase, and winback automation programs across multiple ESP platforms.
- Implemented audience segmentation, suppression logic, and frequency controls.
- Established preflight checklists, render/link validation, and peer review processes.
- Managed deliverability through IP warmups, list hygiene, and SPF/DKIM/DMARC configuration.
- Drove hypothesis-led A/B testing on creative, offers, and timing.
- Developed reusable modular template components reducing build time and enabling scalable personalization.
- Implemented dynamic content and personalization using AMPScript, SSJS, and JavaScript.
- Executed cross-ESP platform migrations with zero missed sends using playbooks, credentials, test sends, and rollback procedures.
- Built KPI dashboards and weekly business reviews; reallocated budget to top-ROI programs.
- Managed capacity planning with prioritization frameworks, WIP limits, and sprint cadence to improve forecast accuracy.
- Coordinated Marketing, Creative, Data Engineering, and Legal teams for data readiness, privacy compliance, and brand consistency.
- Participated in on-call rotations and led incident response with comprehensive postmortems.
- Developed runbooks, checklists, and training materials to standardize operations.

INTERNAL TOOLS & AUTOMATION INNOVATION

Designed and shipped internal tools and automations that measurably increased Professional Services efficiency for client onboarding and platform migrations — reducing manual effort, accelerating ramp time, and standardizing quality across the department.

- **SFMC Wizard** — Built a Salesforce Marketing Cloud automation tool that creates data extensions, triggered sends, and email messages, inspects live SFMC data, and duplicates entire account assets across SFMC instances in seconds. **Impact:** ~8 hours saved per setup or duplication task; enables fast, ad-hoc operations that previously required manual rebuilds.
- **Suite Maker** — Designed and built an onboarding automation tool that auto-provisions complete Wunderkind campaign suites — emails, data extensions, and journeys — in seconds. **Impact:** ~22 hours saved per client implementation, accelerating onboarding across the Professional Services team.
- **Journey Builder (Internal)** — Created a faster, template-driven alternative to Salesforce's native Journey Builder, featuring an intuitive UI, reusable events, and direct fetch/deploy that bypasses Salesforce UI latency. **Impact:** ~2 hours saved per journey versus manual SFMC setup.
- **Lynx** — Built a link/URL validation tool that rapidly QAs onsite and email links to safeguard Wunderkind product integrity during launches and migrations. **Impact:** ~3 hours saved per QA pass, accelerating onboarding cycle time.
- Partnered with Product and Engineering to integrate these tools into onboarding and migration playbooks; authored documentation and training so the broader Professional Services organization could adopt them safely and consistently.

CORE STRENGTHS

11+ years progressive leadership • Large-scale enterprise SaaS/martech implementations • Expert HTML/CSS email development • 6+ ESP platforms (Marketo, SFMC, Responsys, Klaviyo, Acoustic, Sailthru) • Cross-functional team leadership • Technical program management • ≥98% on-time delivery track record • Data-driven optimization • Global stakeholder management • Enterprise client experience

TECHNICAL SKILLS

Email Development (Expert): HTML, CSS, Responsive Design, MJML, Cross-Client Compatibility, Accessibility, Dynamic Content

Email Service Providers: Salesforce Marketing Cloud (ExactTarget), Oracle Responsys Interact, Marketo, Klaviyo, Acoustic, Sailthru

Programming & Scripting: JavaScript, AmpScript, SSJS (Server-Side JavaScript), SQL, JSON, XML

Project Management Tools: Asana, Jira, Smartsheet, Rocketlane

AI & Automation: LLM-Assisted Workflows, Prompt Engineering, AI-Powered Internal Tooling, Conversational AI

Marketing Automation: Lifecycle Programs, Welcome Series, Abandonment Campaigns, Winback Programs, Personalization, Segmentation, A/B Testing

Integration & APIs: API Integration, Data Pipelines, Event Schema Design, Identity Resolution, SFTP, Webhooks

Deliverability & Compliance: SPF/DKIM/DMARC, IP Warming, List Hygiene, Authentication Flows, Privacy Compliance, Data Governance

Analytics & Optimization: KPI Dashboards, Performance Analysis, A/B Testing, Campaign Reporting, ROI Measurement

Program Management: Agile/Sprint Planning, RAID Logs, Roadmapping, Capacity Planning, Change Management, Incident Response

LEADERSHIP SKILLS

Cross-Functional Team Leadership • International Team Management • Stakeholder Management • Executive Alignment • Training & Enablement • Process Optimization • Resource Planning

EDUCATION

Bachelor of Computer Science

2014

Purdue School of Engineering and Technology, Indianapolis, IN

CERTIFICATIONS

- Email Marketing Certification — HubSpot Academy (2025)
- Klaviyo Product Certificate — Klaviyo (2025)
- Klaviyo Developer Certificate — Klaviyo (2025)
- Klaviyo Deliverability Certificate — Klaviyo (2025)
- Introduction to Artificial Intelligence — LinkedIn Learning (2025)
- Introduction to Conversational AI — LinkedIn Learning (2025)

INDUSTRIES SERVED

Global Corporate Retail • Travel & Hospitality • Financial Services • E-commerce
